Driver's License B

ABOUT ME

After my university studies I've reoriented myself to become a web or software developer. After a first experience as a fullstack .NET developer, I wanted to gain more experience as a front-end web / mobile app developer. That's why I've applied and I've been selected to attend a hybrid mobile app developer course for 6 months with 13 other students. In my free time I follow a course on esports business and an online Udemy course on React.

WORK HISTORY

📅 09/2017 - 05/2020
📍 Euroclear SA/NV, Brussels
Jr. .NET Application Analyst
Developing and starting to design new .NET applications.
Analyzing application problems and helping with production support (day & night).
Helping development team in India.
